**NEW SURGE PROTECTION SYSTEM WILL PROTECT  
COMPUTERS FROM LIGHTNING**

Copiapue, NY June 11, 2004 – TII Network Technologies (NASDAQ: TIII) has been providing surge protection to major telephone companies for over 40 years. They recently introduced their first consumer product that will protect personal computers and home electronics, the **TII Lightning and Power Surge Shield**™.

Lightning is the most dangerous and frequently encountered weather hazard that people experience. It is the second most frequent weather-related killer in the United States. In addition, lightning causes billions of dollars in property damage each year, many times resulting in fire, possible injuries and total property loss. Using the proper surge protection system can avert these dangers.

"There is no mandate on surge protection on power lines, this makes it the biggest lightning rod in the United States," said Mr. Alfred J. Roach, Chairman of the Board for TII Network Technologies. "Most people know that lightning storms can cause power surges in the home, but they don't realize the importance of a good surge protection system. Power surges can easily damage your equipment or even cause a fire hazard!"

The **TII Lightning and Power Surge Shield** provides superior protection for computers, telephone, Ethernet, DSL and USB connections. In addition, the Lightning Shield is the only device on the market that is transparent to signal transmission, so users never need to unplug Ethernet, DSL or USB connections from a surge strip to communicate with the speed they are accustomed to. It offers the highest surge energy absorbing capacity on surges that could appear inside the home. In product tests, it has been shown to be capable of protecting against lightning.

- MORE -

The **TII Lightning and Power Surge Shield**, listed to UL1449, features indicator lights that let you know when the product is properly grounded, a space saving AC plug and a smart design that allows room for large plug-ins. The product comes with six feet of telephone cable, Ethernet cable and a USB cable. The retail price of the product is \$59.99 plus shipping and handling.

**The TII Lightning and Power Surge Shield is currently being offered at a special limited time price of \$49.99 with no additional shipping and handling charges. The product can be purchased on the web at [www.lightningshield.com](http://www.lightningshield.com).**

TII, headquartered in Copiague, NY, is a publicly traded company with sales of over \$700 million since its founding by Chairman Al Roach in 1964. In the last 40 years, TII has built a reputation of reliability, ingenuity and quality amongst a critical customer base.
